

INVESTMENT STRATEGY

The Lester Canadian Equity Fund, launched in January 2012, is managed by Lester Asset Management (LAM), and employs the same strategy used in managing LAM's segregated accounts since July 2006. The Fund is invested in 40 to 50 large, mid and small cap Canadian listed companies selected using a disciplined and long-term investment approach. Research is based on a sound understanding of each company and the industry in which each operates, complemented by our macro-economic outlook. The Fund's investment philosophy is value-oriented seeking to purchase shares at a discount relative to a company's true worth, as well as event-driven with the goal of eventually realizing maximum shareholder value either through dividend increases, share buybacks, spin-offs or an outright sale. The Fund's objective is to achieve higher than market returns with lower risk.

MONTHLY COMMENTS

The Lester Canadian Equity Fund rose +5.7% versus +1.2% for the TSX Composite, finishing 2017 with a net return of +14.1% versus +9.1% for the TSX. Our outperformance was mainly due to strong returns from our small/mid-cap holdings, in particular Pure Technologies and NAPEC which both received takeover offers during the month. Most world stock indices moved higher on continued investor optimism. Despite uncertainties surrounding NAFTA, Canadian stocks rose once again on dovish comments by the BOC. Top gainers included Pure Technologies (+93%), Baylin Technologies (+35%), NAPEC (+34%), Neulion (+30%), GoodFood (+23%), Andrew Peller (+15%), Guardian Capital (+14%) and Park Lawn (+11%). Losers included Centric Health (-16%), Nanotech Security (-7%), Winpak (-5%), Badger (-4%), Emera (-3%), Keyera (-3%), Sienna Senior Living (-2%), and Element Fleet (-2%). While several of our recently added holdings have payed off handsomely, we continue to trim some positions and hold higher than normal cash balances in what we consider a generally overvalued market relative to growth prospects.
