

INVESTMENT STRATEGY

The Lester Canadian Equity Fund, launched in January 2012, is managed by Lester Asset Management (LAM), and employs the same strategy used in managing LAM's segregated accounts since July 2006. The Fund is invested in 40 to 50 large, mid and small cap Canadian listed companies selected using a disciplined and long-term investment approach. Research is based on a sound understanding of each company and the industry in which each operates, complemented by our macro-economic outlook. The Fund's investment philosophy is value-oriented seeking to purchase shares at a discount relative to a company's true worth, as well as event-driven with the goal of eventually realizing maximum shareholder value either through dividend increases, share buybacks, spin-offs or an outright sale. The Fund's objective is to achieve higher than market returns with lower risk.

MONTHLY COMMENTS

The Lester Canadian Equity Fund decreased -0.2% versus an increase of +2.9% for the TSX Composite Total Return. Our underperformance was due to our low weightings in the three main industry sectors of the TSX which rose during the month (Materials, Energy, and Financials), high weightings in interest sensitive sectors which declined (Utilities, Telecoms), and drag from large cash balances. Most world stock markets continued to rebound despite the continuing threat of U.S. trade wars and heightened risks in Europe following the election of anti-EURO parties in Italy. Top gainers included Badger Daylighting (+18%), Grande West Transportation (+11%), AG Growth (+11%), Pembina Pipeline (+10%), CN Railway (+9%) and CGI Group (+7%). Losers included Centric Health (-39%), Input Capital (-21%), Velan (-13%), Diamond Estates (-11%), Rogers Sugar (-10%), Altus Group (-9%) and Winpak (-7%). In light of persistent high stock valuations and increasing geopolitical and financial risks, we prefer to continue holding more cash and defensive high dividend yielding stocks.
