

INVESTMENT STRATEGY

The Lester Canadian Equity Fund, launched in January 2012, is managed by Lester Asset Management (LAM), and employs the same strategy used in managing LAM's segregated accounts since July 2006. The Fund is invested in 40 to 50 large, mid and small cap Canadian listed companies selected using a disciplined and long-term investment approach. Research is based on a sound understanding of each company and the industry in which each operates, complemented by our macro-economic outlook. The Fund's investment philosophy is value-oriented seeking to purchase shares at a discount relative to a company's true worth, as well as event-driven with the goal of eventually realizing maximum shareholder value either through dividend increases, share buybacks, spin-offs or an outright sale. The Fund's objective is to achieve higher than market returns with lower risk.

MONTHLY COMMENTS

The Lester Canadian Equity Fund declined -1.1% versus an increase of +1.8% for the TSX Composite Total Return. Our underperformance was mainly due to a massive +12.3% rise in energy stocks in which we are very underweight, combined with declines in several of our small cap stocks including several companies that issued public equity at large discounts to the market. Most world stock markets rebounded after two months of negative returns as investors calmed down following the threat of trade wars between the U.S. and China. Top gainers included Equitable Group (+8%), Centric Health (+5%), CN Railway (+5%), D-Box Technology (+4%), Keyera (+3%) and Plaza Corp (+3%). Losers included Grande West Transportation (-24%), Baylin (-11%), Solium (-9%), GoodFood (-9%), TVA Group (-6%) and Savaria (-5%). Markets remain volatile and stock valuations remain stretched amid increasing concerns regarding inflation and rising interest rates. As a result, we continue holding higher than normal cash balances.
