

INVESTMENT STRATEGY AND PROCESS

Lester Asset Management Inc. ("LAM") launched an actively managed All-Cap Canadian Equity strategy for its segregated accounts in July 2006 and created a pooled version through the LAM Canadian Equity Fund (the "Fund") in January 2012. The strategy's aim is to be different from the S&P/TSX Composite Index and achieve higher returns than the market with lower risk as measured by low market correlation, low cyclical exposure, and better industry diversification. The portfolio is invested in 40 to 50 small, mid and large cap Canadian listed companies selected using a research process based on fundamental bottom-up analysis, strict quantitative and qualitative criteria, and a sound understanding of each company and the industry in which each operates, complemented by a macro-economic outlook. The investment style is value-driven and opportunistic, seeking to buy shares at a discount to a company's true worth, with the goal of maximizing shareholder value through dividend growth, share buybacks, spin-offs or an outright sale.

MONTHLY COMMENTARY

The **LAM Canadian Equity Fund** was down **-2.4%** on a gross basis versus **-4.9%** for the TSX Composite Total Return. World equity markets sold off sharply after a strong rebound in November as gradually slowing inflation data gave way to renewed hawkish rhetoric from the FED signalling it would continue to raise rates until inflation reached a targeted 2%. The S&P500 and NASDAQ plunged **-5.8%** and **-8.7%** respectively for the month, and ended down **-18.1%** and **-32.5%** for the year. Our outperformance for the month was mainly due to our low exposure to the Energy and Financial sectors which were down **-6.4%** and **-5.8%** respectively, and strong returns by several of our small and mid cap stocks. Positive contributions were made by renewable energy producer **Boralex**, cable and wireless provider **Shaw Communications** which rose on the news that the Competition Tribunal ruled in favor of it being acquired by Rogers Communications, as well as natural gas distributor **Altagas**, vitamin maker **Jamieson Wellness**, manufactured home communities operator **Flagship REIT**, and funeral services provider **Park Lawn**. Our biggest detractors included mostly large cap holdings such as **Brookfield Infrastructure**, **TC Energy**, **Bank of Montreal**, **CP Railway**, and **Telus**, as well as **Cargojet** and **Savaria**. We remain of the view that current inflationary pressures will gradually subside and that central banks will soon ease off raising rates. We also believe that an economic slowdown will be mild given strong employment levels and that it should have minimal impact on our portfolio which remains well diversified in recession-resistant businesses with pricing power. Most of our holdings have been reporting record results and are trading at reasonable valuations. We have also been using volatility to invest in high quality companies at attractive prices which should provide the portfolio with strong long-term returns.
