

## INVESTMENT STRATEGY AND PROCESS

Lester Asset Management Inc. ("LAM") launched an actively managed All-Cap Canadian Equity strategy for its segregated accounts in July 2006 and created a pooled version through the LAM Canadian Equity Fund (the "Fund") in January 2012. The strategy's aim is to be different from the S&P/TSX Composite Index and achieve higher returns than the market with lower risk as measured by low market correlation, low cyclical exposure, and better industry diversification. The portfolio is invested in 40 to 50 small, mid and large cap Canadian listed companies selected using a research process based on fundamental bottom-up analysis, strict quantitative and qualitative criteria, and a sound understanding of each company and the industry in which each operates, complemented by a macro-economic outlook. The investment style is value-driven and opportunistic, seeking to buy shares at a discount to a company's true worth, with the goal of maximizing shareholder value through dividend growth, share buybacks, spin-offs or an outright sale.

## MONTHLY COMMENTARY

The **LAM Canadian Equity Fund** declined **-5%** on a gross basis versus **-8.7%** for the TSX Composite Total Return. World equity markets plunged once again on hawkish central bank rhetoric, higher than expected inflation data, and fears of a global recession. The S&P500 and NASDAQ dropped **-8.3%** and **-8.7%** respectively for the month, and are now down **-20%** and **-29%** respectively year-to-date. Europe, Far East and Emerging Markets were also down sharply and have declined **-18.7%**, **-16.5%** and **-15.7%** respectively year-to-date, in Canadian dollar terms. Our outperformance versus the TSX was mainly due to our low exposure to cyclical sectors such as Energy, Gold and Financials which were down **-15%**, **-11.2%**, and **-9%** respectively. While we never like having negative returns, we are pleased with our strong relative performance in a down market. Positive contributors included renewable power producer **Boralex** which won large solar projects in the State of New York, supply chain solutions provider **TECSYS** which released strong results, and **Shaw Communications**. Several of our newer holdings were also positive such as engineering firm **WSP Global** and consumer health products supplier **Jamieson Wellness** which both announced significant acquisitions. Not surprisingly, our biggest detractors were our energy infrastructure holdings such as **Altagas** and **Enbridge**, as well as banks such as **TD** and **BMO**. As previously mentioned on several occasions, we are mindful of the effects of inflation, higher interest rates, and a likely economic slowdown on our portfolio which remains well diversified in mostly recession-resistant businesses. The majority of our holdings have been reporting strong financial results and are trading at very reasonable valuations. We are confident that they will perform well on a relative basis, and we continue to take advantage of market weakness to invest in high quality companies at attractive prices which should provide the portfolio with strong long-term returns.
