

CANADIAN EQUITY REPORT

May 31, 2020

INVESTMENT STRATEGY AND PROCESS

Lester Asset Management Inc. ("LAM") launched an actively managed All-Cap Canadian Equity strategy for its segregated accounts in July 2006 and created a pooled version through the Lester Canadian Equity Fund (the "Fund") in January 2012. The strategy's aim is to be different from the S&P/TSX Composite Index and achieve higher returns than the market with lower risk as measured by low market correlation, low cyclical exposure, and better industry diversification. The portfolio is invested in 40 to 50 small, mid and large cap Canadian listed companies selected using a research process based on fundamental bottom-up analysis, strict quantitative and qualitative criteria, and a sound understanding of each company and the industry in which each operates, complemented by a macro-economic outlook. The investment style is value-driven and opportunistic, seeking to buy shares at a discount to a company's true worth, with the goal of maximizing shareholder value through dividend growth, share buybacks, spin-offs or an outright sale.

MONTHLY COMMENTARY

The Canadian Equity Fund rose +1% on a gross basis versus +3% for the TSX Composite as world stock markets continued their recovery from the panic selling in March. Year-to-date, the Fund is down -10.5% versus -9.7% for the TSX. Our underperformance during the month was due to a pull-back in some of our small and mid-cap stocks which rose strongly in April, not owning Shopify which contributed nearly 1% to the TSX return, and drag from our 12% cash weighting. The strongest contributors to our performance were supply chain software provider Kinaxis and home accessibility equipment manufacturer Savaria. Positive contributions also came from Calian Group, Pembina Pipeline, K-Bro Linen and Goodfood Market. Detractors included Sienna Senior Living which declined on negative sentiment towards the long term care sector, Diamond Estates which pulled back after a strong run, and Centric Health which raised \$10M at a large discount to market in order to accelerate the integration of its acquisition of Remedy. Equity markets have been rallying on the back of record low interest rates, massive government stimulus and liquidity provided by central banks, the anticipation of an eventual vaccine and the gradual reopening of businesses following government lockdowns that are having a material negative impact on the economy. However, the outlook remains highly uncertain as most companies have withdrawn financial guidance for 2020 and beyond. We continue to take a cautious approach by holding more defensive names and higher cash balances in case the recovery is weaker than expected or there is a second wave of the virus.

*Returns for LAM's Canadian Equity strategy are gross of management fees and based on dollar-weighted gross returns for the Canadian Equity composite of segregated portfolios managed by LAM using the same strategy from July 2006 until the launch of the Fund in January 2012 and on gross returns of the Lester Canadian Equity Fund thereafter. **The S&P/TSX Composite Total Return Index is the benchmark that has been used since the inception of LAM's Canadian Equity strategy in July 2006 and the Fund in January 2012, and reflects the policy of investing only in Canadian Equity securities. *** Returns on the different unit series of the Fund will vary due to applicable management fees as well as trading and custodial charges. Note that the Fund does not incur operating costs which are typically associated with pooled fund investments, as these are assumed directly by LAM. Please read the Offering Memorandum before investing in the Fund. Pooled fund returns are not guaranteed as unit values change frequently and past performance may not be repeated.
