

LESTER ASSET MANAGEMENT

RESPONSIBLE GROWTH

GLOBAL BIODIVERSITY FUND REPORT May 31, 2024

INVESTMENT STRATEGY AND PROCESS

Lester Asset Management Inc. (“LAM”) launched the Lynx Global Biodiversity Fund (the “Fund”) in February 2024 as an actively managed thematic global equity strategy. The Fund seeks to provide long-term capital appreciation by investing in equity securities of publicly traded companies listed on recognized global stock exchanges that operate businesses that help protect and promote biodiversity. The Fund aims to meet its objectives by investing in companies that will benefit from powerful long-term global trends related to achieving nature-positive goals and implementing nature-based solutions to halt and reverse nature loss and land degradation, protect and improve the quality of the environment, promote sustainability, and address related issues such as water and food security. The stock selection process is robust using fundamental bottom-up internal research and analysis of companies best meeting one of four internally developed biodiversity-linked investment themes derived from UN Biodiversity Framework (COP15) targets, EU Taxonomy Environmental Objectives, and UN Sustainable Development Goals (SDGs), while also taking ESG and other factors into consideration. The Fund also benefits from the expertise of an Advisory Board for feedback, guidance and insight into specific companies, industry developments, and emerging opportunities.

INVESTMENT THEMES

Environmental Stewardship

Assessment & Monitoring
Remediation & Restoration
Natural Resource Management
Green Infrastructure

Pollution Control and Clean Technology

Water & Wastewater Treatment
Waste Management & Recycling
Air Filtration & Emission Control
Clean Technology

Sustainable Products and Processes

Sustainable Products
Supply Chain Solutions
Circular Economy Processes
Energy Efficiency

Sustainable Agriculture and Food Systems

Agrotechnology & Agriscience
Soil & Crop Management
Food & Beverage Systems
Fishing & Aquaculture

Eurofins Scientific	2.6

FUND ALLOCATION BY INVESTMENT THEME AND GEOGRAPHY

MONTHLY COMMENTARY

In May, the **Lynx Global Biodiversity Fund** generated a gross return of **+2.9%** versus +3.7% for the MSCI World Index Total Return including dividends in Canadian dollars. We are very pleased with this performance considering that the Fund was only 80% invested in May and had no exposure to the “Magnificent 7” tech-related stocks which contributed nearly half of the MSCI World Index return for the month. Since its inception on February 12, 2024, the Fund has generated a gross return of **+6.1%** compared to +7.3% for the MSCI World Index. This return was achieved despite the Fund being, on average, only 60% invested during this period, as inflows from subscriptions were deployed on a gradual basis. Our top performers in May were **Valmont Industries** (irrigation systems), **Clean Harbors** (hazardous waste management & environmental services) and **Itron** (smart water metering). Clean Harbors and Itron reported solid results, and Valmont’s results were far better than expected. Our main detractors were **AECOM** (engineering consulting), **Nufarm** (crop protection & seed technologies) and **Trimble** (global positioning & sensor technology). AECOM released strong results and was likely dragged down by other engineering companies which declined during the month. Trimble also had a strong quarter with higher recurring revenue and increased margins, although issued slightly weaker guidance. Meanwhile Nufarm’s pricing remains challenged due to general weakness in global agriculture. Most of our holdings reported excellent results, confirming our optimistic outlook for the Fund’s strategy. Biodiversity themed investing is in the early stages of multi-decade tailwinds driven by aggressive UN targets to halt and reverse biodiversity loss and restore degraded ecosystems, increasing financial disclosure by corporations regarding nature-related impacts, dependencies and risks, and heightened regulatory compliance regarding “greenwashing”.

PORTFOLIO MANAGERS

Matthew Kaszel, CFA - Portfolio Manager, Global Equities

Matthew joined the firm in 2022 as a Portfolio Manager specializing in Global Equities. With a solid background in finance, he brings over nine years of experience as a research analyst and portfolio manager at an established investment management firm in Montreal. Matthew holds a B. Com in Finance from the John Molson School of Business and is a Chartered Financial Analyst (CFA). Beyond his professional duties, Matthew is involved in several environmental finance and educational initiatives. He is a member of the TNFD forum (Taskforce on Nature-related Financial Disclosures) and a participant in Nature Action 100, a global initiative encouraging corporate action to mitigate nature and biodiversity loss. He is also a board member of the Loyola High School Foundation where he also serves on the investment committee.

Investment team: Stephen Takacsy, B. Eng, MBA - Chief Investment Officer ; Rala Chen, MBA, CFA - Research Analyst, Global Equities
