RESPONSIBLE GROWTH

## GLOBAL BIODIVERSITY FUND REPORT July 31, 2024

### INVESTMENT STRATEGY AND PROCESS

Lester Asset Management Inc. (“LAM”) launched the Lynx Global Biodiversity Fund (the “Fund”) in February 2024 as an actively managed thematic global equity strategy. The Fund seeks to provide long-term capital appreciation by investing in equity securities of publicly traded companies listed on recognized global stock exchanges that operate businesses that help protect and promote biodiversity. The Fund aims to meet its objectives by investing in companies that will benefit from powerful long-term global trends related to achieving nature-positive goals and implementing nature-based solutions to halt and reverse nature loss and land degradation, protect and improve the quality of the environment, promote sustainability, and address related issues such as water and food security. The stock selection process is robust using fundamental bottom-up internal research and analysis of companies best meeting one of four internally developed biodiversity-linked investment themes derived from UN Biodiversity Framework (COP15) targets, EU Taxonomy Environmental Objectives, and UN Sustainable Development Goals (SDGs), while also taking ESG and other factors into consideration. The Fund also benefits from the expertise of an experienced Advisory Board for guidance and insight into specific companies, industry developments, and emerging opportunities.

### FUND ALLOCATION BY INVESTMENT THEME AND GEOGRAPHY

# MONTHLY COMMENTARY

In July, the **Lynx Global Biodiversity Fund** rose **+6.5%** versus +2.8% for the MSCI World Index Total Return, including dividends in Canadian dollars. This was the highest monthly performance for the Fund, driven by strong results including record revenues, profitability, and improved outlooks reported by many of our holdings. Since its inception on February 12, 2024, the Fund has generated a gross return of **+11.9%** compared to +13% for the MSCI World Index. We are very pleased with this result as it was achieved despite the Fund being, on average, only approximately 65% invested during the period and not owning any of the MAG 7 stocks which have mostly been responsible for driving U.S. and world equities higher. Our top contributors were **Tomra Systems** (reverse vending machines and recycling sorting equipment), **Norcod** (aquaculture) and **SGS** (testing, inspection, and certification). Our main detractor was **Montrose Environmental** (assessment and remediation) which sold off on fears of a slowdown related to a Supreme court ruling which could weaken the powers of government agencies such as the EPA (known as the Chevron deference) yet reaffirmed its fiscal year guidance. Also, **Kurita Water Industries** (water treatment solutions) was impacted as Japanese stocks sold off while the yen surged on short covering ahead of another interest rate hike by the Bank of Japan. With the UN targets to halt and reverse biodiversity loss, upcoming disclosure on nature-related impacts, dependencies, and risks, and stricter regulations against “greenwashing,” we are more confident than ever that our thematic investment strategy will produce strong long term returns.
