

LESTER ASSET MANAGEMENT

RESPONSIBLE GROWTH

CANADIAN FIXED INCOME REPORT June 30, 2025

INVESTMENT STRATEGY AND PROCESS

Lester Asset Management Inc. ("LAM") launched an actively managed Canadian Fixed Income strategy for its segregated accounts in January 2008 and created a pooled version through the LAM Canadian Fixed Income Fund in January 2021. The strategy uses a top-down macroeconomic approach to identify the most attractive sectors, types of instruments and maturities, as well as bottom-up fundamental valued-based credit analysis to identify suitable issuers and attractively priced securities. The portfolio is mainly invested in fixed income assets including government issued and guaranteed debt, Investment Grade and High Yield corporate bonds, convertible debentures, preferred shares, and money market instruments. Portfolio structure and risk management include proper diversification by industry, issuer, credit quality and instrument type, as well as laddered maturities. The Fund aims to maintain lower duration than the benchmark in order to minimize interest rate risk, and to achieve a high level of income generation while preserving capital.

QUARTERLY COMMENTARY

During the 2nd quarter, **LAM Canadian Fixed Income Fund** significantly outperformed the FTSE Canada Universe Bond Index with a gross return of **+1.5%** versus a negative return of **-0.6%** for index. Year-to-date, the Fund is up **+3.6%** versus **+1.4%** for the index. Bond markets were volatile during the quarter, mainly due to Donald Trump's tariff threats, recovering somewhat when he softened his tone and postponed most tariffs. Also, geopolitical tensions in the Middle East created much uncertainty, but as the situation calmed down, some positivity returned to the markets. Yields ended the quarter slightly higher on government bonds after tariff threats eased and investors became less negative about the potential impact on the Canadian economy. However, the environment was beneficial for credit spreads and riskier assets in general. Our main contributors for the quarter included high-yield bonds such as **AutoCanada 5.75% 2029**, **Air Canada 4.625% 2029** and **Secure Waste 6.75% 2029**, and preferred shares of issuers like **Brookfield** and **Altagas**. As well, hybrid bonds contributed positively such as **Northland Power 9.25% 2083/2028** and **Pembina 4.8% 2081/2030**. High-yielding dividend stocks like **Capital Power** and **Telus**, which we limit to 5% of the portfolio, also performed well. Our detractors were mainly longer-dated bonds, such as **Canada Government 3% 2034** and **Brookfield Renewable 5.84% 2036**. Despite the strong performance, the Fund still offers an attractive yield of over **5%**, well above the rate of inflation, with a duration of only 4.1 years.

PORTFOLIO MANAGERS

Olivier Tardif-Loiselle, CFA – Lead Portfolio Manager Fixed Income

Olivier joined the firm in 2020 as Lead Portfolio Manager of Fixed Income. He is also a member of the firm's Investment Committee. He spent 7 years at iA Financial Group (Industrial Alliance, 4th largest life insurance company in Canada) in different roles such as credit analyst, senior trader and strategist for Fixed Income.
